

FX380RC Issue 5
Xenon 1 Kw Remote
Control, Variable Speed

APPLICATION

The new FRANCIS FX Premium range of variable speed Remote Controlled Searchlights incorporate the design features required to successfully operate searchlights in the most demanding product operating environments on land and sea.

Francis Searchlights have redesigned and improved the remote controlled Xenon Searchlight still further by adding full variable speed as a standard option at no extra cost. With the "colour temperature" of the Xenon lamp being equal to that of "sunlight" the searchlight is ideal for spotting dangers to navigation in the Polar Regions, such as low-lying icebergs. Other potential hazards, such as debris and small craft, are easily spotted at long range allowing sufficient time for action to be taken.
