

**FX380 1000w Iss 1  
Xenon. Manual.  
Prison Grade**

## **APPLICATION**

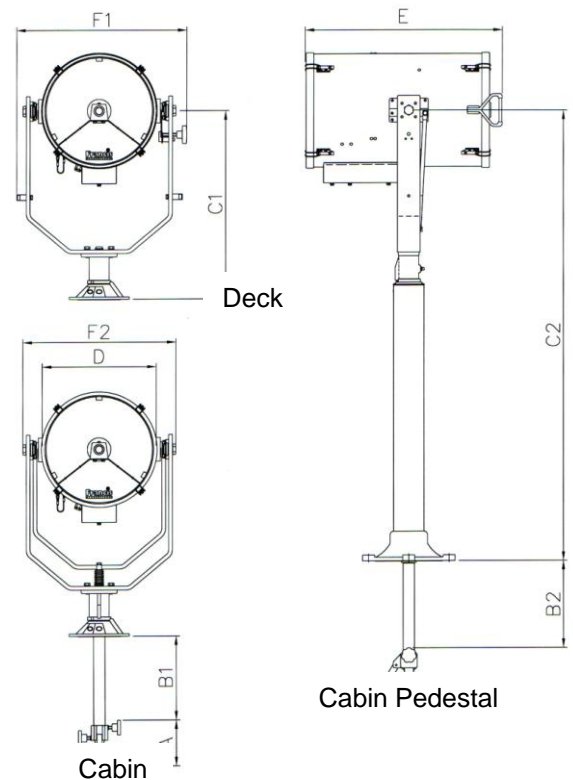

The **FRANCIS FX PRISON & SECURITY** range of high Power Xenon Searchlights incorporate additional design features required to successfully operate searchlights in the most demanding product operating environments.

Francis Searchlights have redesigned and improved the FX380 still further by the use of the highest grades of materials to offer strength, reliability and resistance to attack. In addition, fitted to this product is a super high quality Precision Electroformed Nickel Reflector which is virtually indestructible and will not shatter when hit by bullets.

With additional downward tilting ability of minus 65 degrees below base to assist in the illumination around the guard tower.

This product is the most suitable product available for Prison and Security applications. Many projects have utilized the Francis Prison range, including Camp X Ray, Camp Buka in Iraq, several other locations in the Middle East and Europe. Naturally, Francis products are approved by many authorities, including the US and UK Army.

With the "colour temperature" of the Xenon lamp being equal to that of "sunlight" the searchlight is ideal for spotting dangers and threats at great distances.

### **Part Numbers**

<b>Type</b>	<b>Supply</b>	<b>Weight</b>	<b>Part No</b>
FX380 Deck	115v	45Kg	Part numbers for searchlights dependent on options specified.
