

- Tungsten halogen lamp.
- 12 or 24 volt.
- 150 or 300 watt.
- Corrosion resistant - aluminium die-cast body, stainless steel securing bracket and fasteners.
- Light weight.
- Toughened front glass lens.
- Cooling fins for maximum heat dissipation.
- Marine specification paint finish.

### Application

The Francis Nightflood is a low voltage floodlight which utilises a linear tungsten halogen lamp. It is suitable for deck lighting, work area lighting on fishing vessels and many other marine applications.

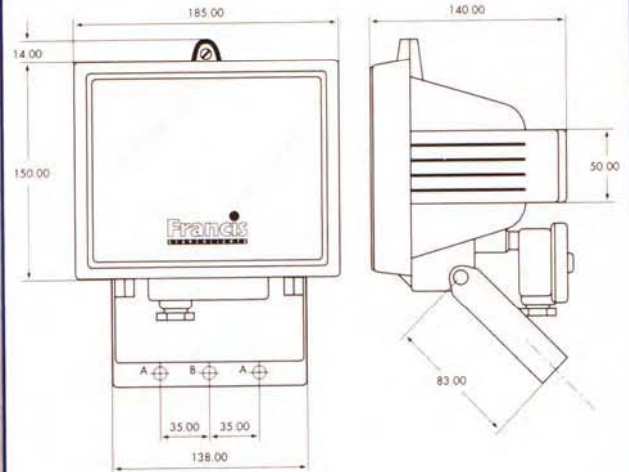

The specially developed low voltage light source fitted to the Nightflood makes it suitable for mounting on emergency service vehicles, enabling the Nightflood to be powered by the vehicles own electrical system.

The design is consistent with the quality standards set by Francis as a market leader. The greatest attention has been paid to detail to ensure the Company's reputation is maintained.

### Specification

- 12 or 24 volt light source.
- Tungsten Halogen lamp.
- Corrosion resistant aluminium die-cast body.
- Stainless steel securing bracket and fasteners.
- Marine specification paint finish.
- Toughened front glass lens.
- Cooling fins for maximum heat dissipation.
- Light-weight.
- IP 55 enclosure rating (IEC 529/BS5490)
