

**FX380 2000w Iss 4
Xenon
Manual Control**

APPLICATION

The FRANCIS FX range of searchlights incorporate the design features required to successfully operate searchlights in the most demanding product operating environments on land and sea.

The "colour temperature" of the Xenon lamp being equal to that of "sunlight" this makes the searchlight ideal for spotting dangers in the Polar regions. Other potential hazards, such as debris and small craft, are easily spotted at long range allowing sufficient time for action to be taken.
