

**FL710 Issue 5
Tungsten Halogen
Suez Canal Searchlight**

APPLICATION

The FRANCIS FL range of searchlights incorporate the design features required to successfully operate searchlights in the most demanding product operating environments on land and sea.

These dual purpose split or single beam Searchlights are built to the Suez Canal Authority Specification and are obligatory for ships passing through the canal. These Searchlights are fitted with a lamp changeover system, one operational and one spare for use in the event of failure.

SPECIFICATION

- Toughened super clear Optiwhite front glass.
- Parabolic split glass reflector.
- Constructed from marine grade materials and fixings
- Powder coated and stove enamel paint finish.
- Pan rotation 360°
- Tilt elevation control +40°, -35°.
- Temperature range +50°C to -40°
- Sealing - IP56 Searchlight
- Searchlight weight 38.60kgs
- Gas proofed for use on tankers.
- Fitted with a pressure relief valve and exhaust cock, for connection to a flexible hose.
- Fitted with lamp changeover system, in event of lamp failure.
- External focusing wheel to permit varying beam divergences.
- Single beam 5-10°. Split beam of two 5° sections with 0-10 Dark center.
- Lamp Life 400 hours.

ALL DIMENSIONS IN MILLIMETRES

Base fixing details:
4 holes Ø12.5 equi-spaced on a 270 PCD
